

# Outdoor Channels

Ideal for pedestrian use in residential or light commercial applications. A modular design, which makes it suitable for installation in the open, against walls or as a transition between areas.

The grate is suitable for paving material from 10 to 40mm thick. Channels can have multiple outlets with fall to each of them. Manufactured in Australia from Gr316 stainless steel.

Outdoor channels and grates can be made to any length, in three grate widths and two grate patterns.
