

hinged grate deluxe urinal

The **Veitch Hinged Grate Deluxe Urinal** is ideally suited for all areas where a high standard of hygiene is required such as schools, hotels and public toilets. It has a 610mm wide tray with non slip stainless steel hinged grate, 275mm return wings and full length weir sparge to the face. It can be installed flush to the floor or with a raised step and stainless steel front panel, which is suitable for both tiled and vinyl floors.

Operating features, Key features & Optional extras:
Refer to page 3.2a for more information.

Specifications:

Inlet: Top inlet for wall mounted cistern, or rear inlet for concealed cistern. Both to suit with 40mm dia. tube (copper). One inlet required for every 2.0metres in length.

Outlet: Select from 50mm BSP outlet for connection to PVC trap, or a 100mm dia. outlet tapered for use with a pan collar. The outlet is positioned 175mm from the rear wall and 150mm either end however, the outlet can be positioned almost anywhere along the length of the tray.

Fixing: The urinal comes with stainless steel legs for stability. It is designed with a side tiling flange at either end, which must be vertical when installed. It is attached to the rear and side walls by screwing through the 12mm tiling flange at the top and the sides. Bring wall tiles down over the tiling flanges.

Floor mounted model: (Left)

This model sits above the floor and can be used with tiled or vinyl floors. It should be ordered with a stainless steel front skirt to conceal plumbing.

Recessed model: (Right)

This model is recessed into the floor and sits flush to the floor.

All Veitch urinals are **WELS approved!**

Water rating when used with cistern. (Tested with Caroma Water Wafer 600mm flush pipe)

Water rating when used with automatic flushing device. (Tested with Reece Sensor Flush 1000mm flush pipe)

 **Designed & manufactured in Australia.**
